

How to allow security permissions in Excel

	<p>① Place the mouse cursor on the downloaded file and select Property from the right-click menu.</p>
<p>② Check [Unblock] in the bottom right of the property menu.</p> <p>③ After checking, click Apply (you can also close the screen by clicking OK)</p> <p>④ Security has been approved. If macro security is displayed when starting the excel, please select "Enable Content" to use the excel file.</p>	 <p>Sample Addin.xlam Properties</p> <p>General Digital Signatures Security Details Previous Versions</p> <p>Type of file: Microsoft Excel XLL Add-In (xll)</p> <p>Opens with: Excel</p> <p>Location: C:\Users\Fred</p> <p>Size: 242 KB (248,744 bytes)</p> <p>Size on disk: 244 KB (249,856 bytes)</p> <p>Created: Friday, February 10, 2023, 3:09:06 PM</p> <p>Modified: Friday, February 10, 2023, 3:10:41 PM</p> <p>Accessed: Today, February 10, 2023, 3:10:41 PM</p> <p>Attributes: <input type="checkbox"/> Read-only <input type="checkbox"/> Hidden Advanced...</p> <p>Security: This file came from another computer and might be blocked to help protect this computer. <input type="checkbox"/> Unblock</p> <p>OK Cancel Apply</p>
